

# Facilities access for third parties

## The opportunity

**Did you know that we have customer assets attached to our infrastructure in over 150,000 locations across South Australia?**

Our unique combination of assets and infrastructure spans our great state – from the iconic Stobie pole, to land, ducts, fibre and telecommunication towers, we've got South Australia covered. This provides you an opportunity to attach assets to ours in many strategic locations.

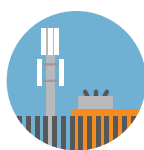

## What we offer

- ✓ Access to a wide variety of infrastructure sites throughout metropolitan and rural areas.
- ✓ Provision of support services, such as design.
- ✓ Reduced timeframe of Make Ready Work.
- ✓ Dedicated key contact.
- ✓ Guaranteed turnaround times for access and enquiries.
- ✓ Information readily available in one online location.
- ✓ Dealing directly with one asset owner.

## Communications & Technology

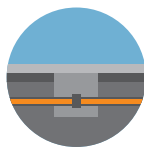

**Mobile phone towers**  
Real estate  
Substations

**Mobile phone antennae**  
Buildings  
Large power poles

**Small cell antennae**  
Buildings  
Power poles  
Light poles

**Fibre/cable routes**  
Underground network  
CBD & Metro

**Promotional banners**

Distribution network  
Light poles

## Our process

### Engage

- Expression of Interest
- Review SA Power Networks Terms and Conditions – Facilities Access Agreement and fees

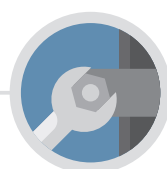

### Design

- Safety review
- Selection of infrastructure
- Site readiness review
- Determination of power supply (if required)

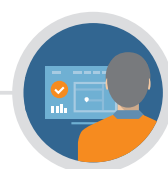

### Prepare

- Site licence application
- Make Ready Work quotation
- Make Ready Work completion
- Power supply application

### Install

- Power supply connection point
- Install customer owned asset
- Energise power supply

### Operate

- Operate and maintain asset
- Infrastructure maintenance
- Invoicing and payment

## Frequently Asked Questions

### Who can attach assets on SA Power Networks infrastructure?

Third party companies with a registered ABN and Government may apply for access to SA Power Networks infrastructure.

### On what kinds of infrastructure can third party assets be attached?

SA Power Networks owns and operates many facilities across South Australia that are suitable for third parties to make use of, including Stobie poles, light poles, communications towers, optic fibre, sub stations, buildings and real estate.

### Where is SA Power Networks infrastructure located?

Our distribution network spans the majority of South Australia's populated areas ranging from the far west coast of Eyre Peninsula, north to Leigh Creek and south east to the Victorian border.

### What is a Facilities Access Agreement?

An agreement between both parties that defines the access and commercial terms and conditions for your asset.

### What are the costs involved?

Costs are dependant on the type of equipment and location. We have straightforward pricing available.

### When can my asset be installed?

Customer owned assets can generally be installed after completion of a Facilities Access Agreement. A Site Licence for the individual site will be issued to ensure that the site is accessible.

### Who will install my asset?

Depending on the type of asset to be installed, the asset may be installed by SA Power Networks, your own company technicians, or by a suitably accredited contractor.

### When can I access my asset?

Depending on its location, you may generally have access to your asset 24/7.

### Why is access to SA Power Networks infrastructure managed?

SA Power Networks is committed to ensuring the safety of the community and our employees. It is important that we ensure the suitable integration of third party assets on our infrastructure.

### Who do I contact for further information?

For further information or to ask a specific question, please contact our Facilities Access Contracts Manager at [facilitiesaccess@sapowernetworks.com.au](mailto:facilitiesaccess@sapowernetworks.com.au) or call (08) 8404 5399.

## Register your interest

To register your interest in utilising our infrastructure, you will need to provide details of your proposal including contact details, ABN, technology type, location and timeframe, via an Expression of Interest form available from the 'Facilities access' section of our website [sapowernetworks.com.au/industry/facilities-access](http://sapowernetworks.com.au/industry/facilities-access)

## Further information

For general enquiries or support with existing Facilities Access Agreements, email [facilitiesaccess@sapowernetworks.com.au](mailto:facilitiesaccess@sapowernetworks.com.au) or contact us on (08) 8404 5399.

SA Power Networks is the sole electricity distributor in South Australia. We manage the network of poles and wires that transport electricity to homes and businesses.

---

Delivering power to **99%** of SA's population

---

**862,815** customers – 72% metro – 28% regional

---

**647,000** Stobie poles

---

**82,000km** route length

---

**416** zone substations

---

**178,000km<sup>2</sup>** network coverage

---

---

#### Delivering services efficiently

---

The AER's benchmarking report released in December 2017 recognise SA Power Networks as the **most efficient distributor** on a state-by-state basis, based on 'total factor productivity'.

---

Providing a **safe, reliable and secure** electricity supply is our core business.

---

**A focus on safety** underpins everything we do. We lead the industry in safety performance.
