INSTALLING SOLAX PV INVERTER WITHIN SOUTH AUSTRALIA RELEVANT AGENT INSTRUCTIONS

Dear SolaX Power PV Inverter Installer,

Introduction:

Within the state of South Australia, the Energy and Technical Regulation, part of the Department for Energy and Mining, has a mandatory requirement that they can remotely disconnection and reconnect PV inverters to ensure grid stability. Further information can be found on the web ([here](#)) or by emailing the Department for Energy and Mining on otr.smarterhomes@sa.gov.au.

The purpose of this document is to ensure that you, the Installer of a SolaX Power PV Inverter, are aware of the requirements for the SA remote disconnection and reconnect and provide a procedure on how to fulfill these requirements when installing a SolaX Power PV Inverter Installer

SAPN Embedded Generation Application Form:

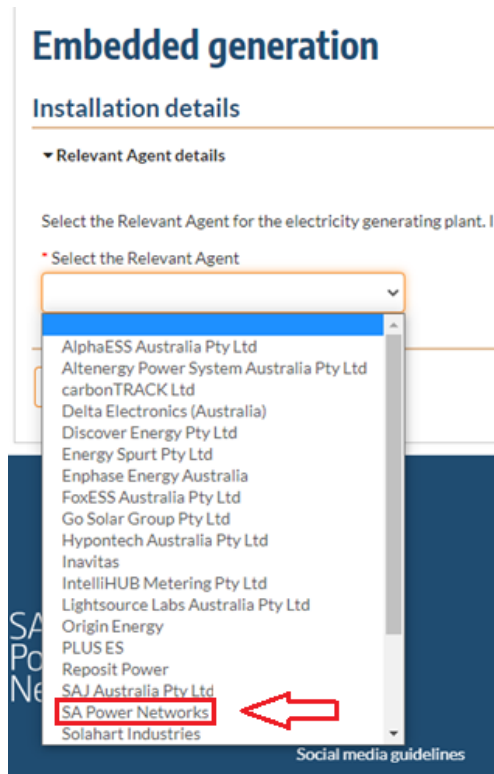

As a solar installer in South Australia, you will be aware of the SAPN Embedded Generation application form. When completing this form, please select “SAPN – Solax” as relevant agent for PV inverter.

SolaX Installation and Registration:

When installing a SolaX Power PV Inverter, you are required to:

1. install the meter/CT supplied by SolaX Power for all installations and
2. connect the system to Solax Cloud (www.solaxcloud.com) for end-users using Pocket WiFi/Lan V2.0.
3. Report a list of new connections (NMI and corresponding WiFi Serial Numbers*) to support@solaxpower.com.au within 7 days of installing the SolaX Power PV Inverter.

* The WiFi Serial Number can be found on both the WiFi Dongle and the box it come in.

Thank you for your understanding and cooperation. Please don't hesitate to contact us if you have any question.
