

What if I don't have a meter number for my site?

It's not a problem, you can use the REX number.

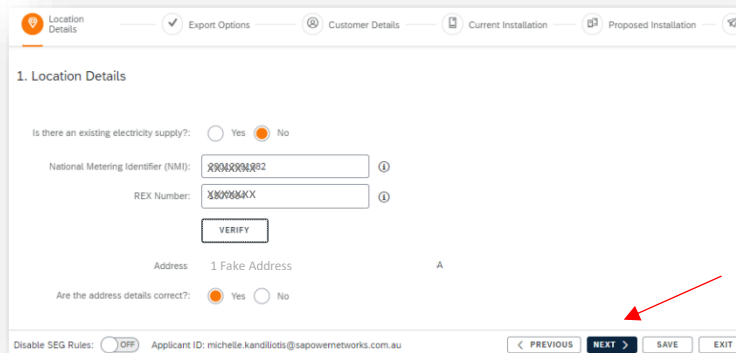

1. Click the "Create new application" button on the dashboard

2. Click "No" alongside "Is there an existing electricity supply?". Then enter the NMI and REX number, and click "verify"

3. The address will be displayed, if this is correct, click "next" to continue

4. Continue to create the application as normal
