# **Medium Embedded Generation (MEG) Connection process**\*

EG 31-200kVA

EG 201-500kVA

# Apply through SmartApply

1

Register for SmartApply via our website, then complete and submit the EG Application form with all required information.

### Pay a fixed analysis fee

Fee ACS427 from Manual 18.

3

Undertake technical analysis and prepare a connection offer.

#### Firm offer released

Firm offer as well as Ongoing Supply and Connection contract released. No additional fees if no further construction identified during assessment.

4

#### Firm offer released

Firm offer as well as Ongoing Supply and Connection contract released. Additional fees for SCADA (usually systems exporting over 200kW) and non-standard sites to be communicated at the time of offer. Additional fees may apply if construction

identified during assessment.

#### Return signed offer and contract

Return the signed documents to confirm acceptance.

5

### **Return signed offer** and contract and pay final invoice

Return the signed documents. Where applicable final payments, Joint Operating Protocols and SCADA coordination will all be finalised (based on firm offer).

## **Customer installs system**

Arrange for the system to be installed and register completion in SmartInstall.

# Witnessing requested and completed

Make a booking for us to witness the commissioning of your generating system. A Certificate of Compliance is required from your electrician.

Customer

<sup>\*</sup>Rotating Generators of all capacities will be processed as Large Embedded Generation
