

Appendix G: Augmentation Rates

Table 6 – Augmentation Rates

Augmentation Rates (2022/23 - Exclusive of GST)					
Network Element	Residential		Non-Residential		Comments
	Country (\$/kVA)	Metro (\$/kVA)	Country (\$/kVA)	Metro (\$/kVA)	
Standard Rates					
Low Voltage	403	403	278	278	Applies if connection is via shared low voltage mains, e.g. connected to the terminals of a low voltage service pillar.
Distribution Transformer	397	397	274	274	Applies if connection is supplied via the low voltage transformer terminals of an established shared transformer.
Feeder High Voltage	262	262	181	181	Applies if supplied via a connection to a shared high voltage feeder, or via a transformer that forms part of the customer connection costs.
Additional applicable rates					
Zone substation	410	305	282	211	Additional to the standard rate and applies if the customer demand is >10% of the Zone Substation capacity.
Sub-transmission line	641	211	442	146	Additional to the standard rate and zone substation rate and applies if the customer demand is >10% of the Sub Transmission line capacity.
Standalone rates when connecting directly to a substation or sub transmission line					
Zone substation	N/A	N/A	282	211	Applies if the customer demand is >10% of the Zone Substation capacity and customer will be connected on the applicable Zone substation Tariff.
Sub-transmission line (66kV)	N/A	N/A	442	146	Applies if the customer demand is >10% of the 66kV Sub-transmission line capacity and the customer will be connected on the applicable Sub Transmission Tariff.
Sub-transmission line (33kV)	289	N/A	289	N/A	Applies to the total incremental requested demand when connecting to a 33kV feeder on the applicable Tariff assigned to this type of high voltage connection. (70 kVA augmentation threshold applies to this type of connection)

Notes:

The augmentation rates in Table 6 will increase annually in-line with the annual consumer price index increase as published by the Australian Bureau of Statistics (ABS) for All Groups, CPI, Australia, Weighted Average of Eight Capital Cities for the (March) quarter.

GST will be applied to the listed rates as part of the Negotiated Connection Offer.
