Discover your power of possibility

Engineering Vacation Program

Empowering South Australia

Engineering Vacation Program

There's a simple way to apply what you're learning at University and work on some real projects.

Our summer Engineering Vacation Program offers 12 weeks of paid employment to undergraduates.

As one of South Australia's biggest employers we offer a range of opportunities. You'd be joining at an exciting time too – we're currently at the centre of an energy revolution, leading the way in the shift to green energy.

What's on offer?

If you're studying for a degree in Engineering subjects, it's very likely we've got some exciting projects for you to get your teeth into.

We want your time with us to be diverse, interesting and challenging. You'll be able to apply what you're learning at University and consider your long-term career options. We offer a safe and supportive environment where you can try out new ideas and make a difference.

As well as a 12-week summer program, we also offer work-integrated learning placements for undergraduates seeking short-term opportunities throughout the year.

An exciting time in energy

Your contribution will be crucial as we empower South Australia through our leadership role in our State's green energy transition:

- Help drive achievement of our State's goal of net-100% renewable energy by 2030
- Develop solutions that meet the changing way customers want to make, use and store energy
- Help build network resilience to increasingly severe weather events
- Innovate to enhance our efficiency, sustainability and customer service

“I really enjoyed the Vacation Program – it was a great way of putting my engineering knowledge into practice and I was able to complete projects in the real world. I’ve since completed the Engineering Graduate Development Program and am loving the direction my career has taken.”

Emily Lauritsen – Network Planning Engineer
(Engineering Graduate Alumni)

Benefits

There are many benefits to our Engineering Vacation Program:

- ✓ Real life experience in a professional working environment
- ✓ A chance to build your skills, knowledge and business networks
- ✓ A ‘test drive’ of your potential profession
- ✓ Enhanced personal development
- ✓ Paid employment while having a great time

This also offers a fantastic pathway into our Engineering Graduate Development Program, and you can really enhance your chances of securing a long-term opportunity with us.

Eligibility criteria

We would love to hear from you if you are in or entering your penultimate year of undergraduate study in Engineering (electrical/electronic, mechatronic, mechanical or civil/structural).

All applicants must be Australian citizens or permanent residents.

When and how do I apply?

Applications for the 12-week paid summer employment open in August and can be made via our Current Vacancies page.

Offers are made by September/October and the program runs from November to February.

We are committed to fostering a diverse and inclusive workplace, and proudly support a growing number of female, mature age, and Aboriginal and Torres Strait Islander graduates.
