South Australia

Flexible Exports Trial

Enabling more solar for South Australians

**Our Goal: Double the amount of Solar on our network by 2025**

**NEW and UPGRADING CUSTOMERS**  
connecting in overloaded areas can choose between:

**FLEXIBLE EXPORTS**

Export limits up to

**10.00 kW**  
Per phase

Analysis shows export limits typically will be 10kW 98% of the time\*

**FIXED**

Export up to

**01.50 kW**  
Per phase

**Flexible Exports**

- ✓ greater exports into the network
- ✓ variable exports up to 10kW per phase
- ✓ safer, more reliable and affordable electricity supply
- ✓ allows more people to benefit from solar
- ✓ world-leading technology
- ✓ more renewable energy in South Australia

The MORE customers that adopt Flexible Exports, the MORE solar we can accommodate on our State's electricity network

**Flexible or Fixed? Talk to your solar installer about why Flexible Exports could be the best option for you.**

**To find out more, ask your solar installer:**

- Am I eligible for Flexible Exports?
- How does Flexible Exports compare with Fixed Export option for my circumstances?
- What's my internet requirement if I want to opt in for Flexible Exports?
- Are you able to provide me with a solar system that is compatible with Flexible Exports? A full list can be found on the SA Power Networks website: <https://sapowernetworks.co/compatible-equipment>

**Current inverter brands**  
with compatible models for Flexible Exports
