## Our Goal: Double the amount of Solar on our network by 2025

### NEW and UPGRADING CUSTOMERS
connecting in Flexible Exports eligible suburbs can choose between:

**FLEXIBLE EXPORTS**
Export limits up to

**10.00 kW**
Per phase

**FIXED**
Export up to

**01.50 kW**
Per phase

**Flexible Exports**

- ✓ greater exports into the network
- ✓ variable exports up to 10kW per phase
- ✓ safer, more reliable and affordable electricity supply
- ✓ allows more people to benefit from solar
- ✓ world-leading technology
- ✓ more renewable energy in South Australia

The MORE customers that adopt Flexible Exports, the MORE solar we can accommodate on our State's electricity network

### Flexible or Fixed? Talk to your solar installer about why Flexible Exports could be the best option for you.

**To find out more, ask your solar installer:**

☐ Am I eligible for Flexible Exports? Find out from: sapowernetworks.co/FE-check-eligibility

☐ How does Flexible Exports compare with Fixed Export option for my circumstances?

☐ What's my internet requirement if I want to opt in for Flexible Exports?

☐ What do I need to do if I want to opt-in for Flexible Exports once it becomes available?

For more information contact us at newenergyservices@sapowernetworks.com.au or call 13 12 61

Outcome is dependent on the network location, inverter capacity and reliability of customer internet connection. See FAQs at sapowernetworks.com.au/future-energy/solar for more details
