

# Flexible Exports

Enabling more solar for South Australians

SA  
Power  
Networks

Empowering  
South Australia

**Our Goal: Double the amount of Solar on our network by 2025**

## It's a challenging goal.

Excess solar exports can lead to:

- ⊖ unstable supply
- ⊖ local voltage issues
- ⊖ potentially wider outages

## The Solution: Flexible Exports

Solar exports automatically adjust to match the available capacity on the network.

**No change for current solar customers.**

**New and upgrading solar customers connecting in Flexible Exports eligible suburbs can choose Flexible Export option (up to 10kW) or Fixed Export option (1.5kW).**

**What does this mean for you?** It's simple.

- 1 Check if your customer is offered the new Flexible/Fixed export option**
- 2 Talk to them about these options**
- 3 Select the preferred option when applying**

Look up address or NMI on our Flexible Exports Eligibility Checker

## NEW and UPGRADING CUSTOMERS

connecting in Flexible Exports eligible suburbs can choose between:

### FLEXIBLE EXPORTS

Export up to

**10.00 kW**

### FIXED

Export up to

**01.50 kW**

## Flexible Exports

- ✓ greater exports into the network
- ✓ variable exports from 1.5kW to 10kW per phase
- ✓ safer and more reliable electricity supply
- ✓ allows more people to benefit from solar
- ✓ world-leading technology
- ✓ more renewable energy in South Australia

**Talk to your customers about Flexible Exports and how they can opt-in when available.**
